

CLASS 89

INTRODUCTION

The following numbers have been issued by the Rolling Stock Library (RSL) for privately owned diesel and electric locomotives for situations where the original TOPS number has been reused. The third digit represents the power classification and the last two digits are the final two digits of the pre-TOPS number, except where duplication occurs. The only exception is 89212 LUL 12 Sarah Siddons. Not all the preserved/privately owned locomotives are included in the series.
