

**Fri 6 Feb** ‘The Lynton & Barnstaple Railway Trust, 1979 to Date’ by Mark Bladwell.

**Portbury Dock Branch line** The GBRf import steel slab destined for milling at Tata Port Talbot Works has commenced 2026 as a near week-daily, daily operation with up to 22 KEA wagons in use with locos 66712/8. 66756/9., all being so far recorded in 2026. A notable visitor on 27th January was DMU 153385 (Visual Inspection Unit 3) on a 3Q33 07.50 Westbury-Kingsland Road working which had also taken in Salisbury and Swindon, the move booked for three runs over the line was delayed having not departed Ashton Junction until 13.19 with an arrival at 14.02 close to 50 minutes late, a tree having had to be cleared being the reason, as the line had seen no traffic for the past 3 days. As a result of the late running, a second run did take place (with a Bedminster reverse back at 14.48 instead of in Temple Meads) which arrived not long after 15.00, but the third was cancelled. This Colas operated test/developer route learning run was a first for this type of unit in departmental use here with three drivers being present on board over the Portbury branch section. Otherwise, GWR 153380 had also in fact appeared over the line back in September 2012 as part of a Bristol Community Rail Day Passenger event working with Class 150 sets which also during the day covered the Henbury loop.

**Bristol Temple Meads** On 22nd December 150234 5Z76 11.30 St Phillips Marsh-Exeter St Davids 12.04

On 27th 60046 6M02 07.04 Tytherington-Quainton at 08.08

**Severn Beach Branch line** With the direct route from Avonmouth Dock to Filton/Bristol Parkway closed for a second period from 19.00 24th December 2025 - 19.00 4th January 2026 for further 'Metro-West 2' station work at Filton North /Brabazon (platform) and Henbury, freight diversions via Clifton Down again took place. The Northolt-Severnside SITA inward rubbish trains operated as a diversion during most non-Bank Holiday afternoons (the empty outward train to Brentford being still booked this way during the evening), whilst Hanson's Cement traffic used Bristol East Yard to attach/detach a second loco and run this way, but for this period no stone trains were scheduled to operate. Although there were only two different single daylight return paths for the whole period (which were not used), all Hanson's Cement arrival and departures were in the hours of darkness with 66755 + 66712 on 27th December, the same pair recorded Clifton Down at 21.40 with 6V84 loaded bogie PGAs from Penfford during the following day and 66752 + 66760 appearing at 23.06 on 29th with 6V84 loaded tanks from Clitheroe (including 6 4 wheel PCAs), all trains crossing local Turbo DMU passenger services. Their respective returns were early during the following mornings being routed north after the call in Bristol East Yard.

**Tytherington Quarry Branch line** Between Christmas and New Year, 37425 (on hire to Colas) was Kingsland Road out-based having arrived on 27th December from Derby RTC, the loco visiting both the Tytherington Quarry and Westerleigh (for Colas OTP depot) branch lines during the following day as 0Z37 08.00 ex. Kingsland Road and return, the loco reaching the Grovesend head-shunt end (A38 tunnel) at the Quarry arriving 09.03 and departing 09.05, then following a Westerleigh visit (from 10.05-10.13) only covered part of the Tytherington line being recorded out and back near Iron Acton before and after 11.00 having not reached the Quarry. A second run to Westerleigh was then believed to have taken place prior to a just over 90 minutes early at 11.50 departure from Yate back to Kingsland Road, a third Quarry run having been cancelled.
