#### Books on Accidents held in the Archive and Library

The RCTS Archive and Library, besides holding a large number of official Accident Reports, has a considerable number of books on railway accidents.

Use the search term “accident” or “disaster” or filter for Class G08 in the book list to find relevant volumes. For major accidents it is also worth searching by the name that the accident is usually known as (e.g. Quintinshill) to find specific books.

**Section A : Railway Accident Reports Issued by Ministry Of Transport / Department of the Environment etc:**

The RCTS Archive and Library contains a large number of accident reports from the United Kingdom and some overseas accident reports. Most of the reports are held as individual documents but some bound volumes also exist and are noted in the lists below.

A reference number in the first column indicates the individual report being available in the library and the third column indicates whether the original or a photocopy is held. N/A indicates that a report exists but a copy is not held in the RCTS archive and Library.

Original copies of the reports are also available in bound Volumes (Reference F429(41) in the second column) from The Institute of Transport, London, titled "Ministry of Transport Reports on Railway Accidents" Bound in volumes for the following years:

1938 (also includes a copy of AA38/A, AA38/B,)  
1937 & 1945-1948  
1949-1950  
1951-1952  
1953-1954  
1955-1956  
1957-1958  
1959-1961  
1962-1964  
1965-1966  
1967-1968  
1968-1970  
1971-1972  
1973-1974

Annual reports are listed in the next section. Some of those are also available in two bound volumes from The Institute of Transport, London and are indicated as such in the lists.
