

# RCTS Rail Tours

|                                   |   |
|-----------------------------------|---|
| <b>Reference Number</b>           | <p>A number given to the rail tour. Numbers 1, 200 and 250 are as advertised in the itinerary. It seems as if these should be in numerical order but there are some gaps, additions and a separate system for numbering industrial tours.<br/> <b>It is this number used in the PDF file name.</b></p> <p>Note that the numbering system seems to originate with the list published in the May 1968 issue of The Railway Observer. Some multi-day tours had only one number, others had suffix letters for each day. It seems as this was based on the itinerary, whether one for the whole tour or an itinerary for each day.</p> <p>Where additional tours have been discovered they are slotted into the numbering system using a suffix letter.</p> |
| <b>Other Reference Number</b>     | <p>A number, generally the reference number prefixed by 4, used historically on some documents. <b>No new numbers are being issued.</b> Some numbers have suffixes for individual documents.</p> <p>A note has been seen indicating the "4" prefix may have originally indicated that a copy of the itinerary was held in the library.</p>  |
| <b>Documents In RCTS Archive?</b> | Indicates whether we have the associated documents (Itinerary etc) in the archive. If we have them, they are also stored as PDF files.  |
| <b>Date</b>                       | Date the rail tour ran. Note that occasionally dates changed for operational reasons  |
| <b>Railtour Title</b>             | Title as on the Itinerary.  |
| <b>Description 1</b>              | Outwards route. It has been suited to the space available in the spreadsheet so may be debatable!   |
| <b>Description 2</b>              | Return route. It has been suited to the space available in the spreadsheet so may be debatable!   |
| <b>Organising RCTS Branch</b>     | The organising branch of the RCTS.  |
| <b>Joint Organiser:</b>           | Any other branch, society or organisation that was involved with the organisation of the tour.  |
| <b>Locomotives</b>                | Motive power. Needs reference to the RO reports to improve this column.   |
| <b>Notes</b>                      | Any additional information or queries.  |
| <b>RO Report</b>                  | References the appropriate copy of The Railway Observer, where known. A work in progress.   |
| <b>RO Photo</b>                   | References the appropriate copy of The Railway Observer, where known. A work in progress. Where we have additional photographs of a tour, these are stored in a separate box (one for post card size and one for larger sizes and industrial tours) and denoted by the word "Photo" in this column. Many of the photographs (with a small pencil reference number in the bottom right corner) are by Jack Faithfull.  |
| <b>RCTS Overseas Tours</b>        | This is very much a work in (slow) progress. Few paper details are available and more information is probably available in the Railway Observer.  |

## Notes on non-RCTS Tours

"Tours By Other Organisations" is a list of miscellaneous files donated to the Society amongst other papers. These files have been scanned and paper copies disposed of.

Reference numbers are for our convenience to list the files in date order and do not necessarily relate to reference numbers that may be used by the other societies or companies (some of which no longer exist). Although if the organisation used a reference number, then it is used.

Files relating to the SLS, LCGB and BLS and REC have been donated to the respective societies in case they include details not already in their archives.

We also have a separate spreadsheet, in the railtour folder, produced by the SLS giving details of their railtours and a list detailing 36 tours organised jointly by the Stephenson Locomotive Society and the Manchester Locomotive Society.

Abbreviations are as follows:

| <b>Abreviation</b> | <b>Society or Organisation</b>                            |
